

DESK-TOP FRICTION FEEDER

The desktop baffle-type feeder utilizes the “baffle separation” principle and is powered by a single friction feeder. Unlike conventional systems, it does not require a friction pressing belt, making it ideal for feeding thick, rigid, and heavy materials such as paper boxes, cards, and plate products.

BENEFITS

- ✓ Efficiency 0 - 300 pcs/min
- ✓ Belt speed 60 m/min
- ✓ Stainless steel body

Technical Parameter

BY-TF04-300

- Machine dimension L*W*H 1300*635*540mm (conveyor belt width 300mm)
- Weight 35 Kgs
- Voltage 220 VAC 50/60Hz
- Power 400 Watts
- Output 300 pcs/min (depending on object size)
- Belt speed 60m/min (adjustable)
- Available product size L*W*H (60-300)*(60-280)*(0.1-3) mm
- Speed control method frequency conversion or brushless DC speed adjustment
- Available product kinds of paper, plastic bags, car ds, labels etc. especially suited for thick, hard and heavy paper boxes, cards, plates, etc.
- Machine body stainless steel

Key Advantages

- ✓ No pressing belt – reduced wear and tear
- ✓ Stable friction for smooth and reliable feeding
- ✓ Fast and efficient operation
- ✓ Compact desktop design, easy to integrate into existing setups
